

Why choose AyrKing Breeder/Blender/Sifters?

PROVEN PERFORMANCE

AyrKing has supplied over 50,000 sifter machines around the world. These machines help support major brands everywhere, every day! Ask field personnel, franchisees, or cooks at major brands....chances are they'll say AyrKing beats the rest.

RELIABLE VENDOR

AyrKing has provided foodservice equipment for nearly 45 years - sifting equipment for nearly 25 years. Our history of quality engineering with superior customer service is unmatched. Not just salespeople, we are qualified, experienced solution providers with over 80% of our personnel having a college engineering degree. Solicit comments within the foodservice industry from purchasing, franchisees, operations, distributors, etc. More than likely, they will have a highly positive impression of AyrKing.

THE MACHINE

Our rotary brush blends, sifts, and ejects dough balls simultaneously – guaranteeing product consistency. No other machine blends ingredients as it sifts. In fact, the vibration/agitation of other designs segregates your ingredients.

No agitating arm or gyrating, vibrating action that accelerates mechanical wear

Extremely quiet operation – create results, not disturbances

Push-button solid-state timer stops motor after one-minute – freeing labor for other tasks & saving energy

Direct drive, heavy duty steel gear motor – no belts to break or adjust

Sifts 30 LBS (14kg) of breadings in 50 seconds

Gray and white plastic lugs eliminate confusion between breadings types

Only four internal parts allows quick, easy cleaning

Dough balls collected in a separate, directly accessible large capacity pan. Requires less emptying, as well as, less effort to access to empty.

CE, UL, and NSF approved – thus meeting global certification needs

CHECK THE COMPARISON:

	AyrKing	Fabrasteel	Quality	Bettcher
Mixes and blends ingredients as it sifts	Yes	No	No	No
Timed cycle	Yes	No	No	Yes
Direct drive, steel geared motor	Yes	No	No	No
Color-coded breadings lugs (gray and white)	Yes	No	No	No
Waste pan accessible from table front (no table movement)	Yes	Yes	No	Yes
Quiet Operation	Yes	No	No	No
No Vibration, Agitation, or mechanically stressful motion	Yes	No	No	No
Multi-Language instructions and machine labeling	Yes	No	No	No
Color coded lugs: Plastic (gray & white) or Aluminum lugs	Yes	No	No	No
UL Listed	Yes	No	Yes	Yes
NSF Listed	Yes	No	Yes	Yes
CE Mark	Yes	Yes	No	No
Power usage (AMPS at 115/230v)	2.3 / 1.2	5.3 / 2.8	5.1 (115v)	5.0 (115v)
Number of internal components removed for daily cleaning	4	3	3	6
