

# Great coffee every time... no skill required!

***If you wish to serve your clients perfect espresso the Rosetta is a self-given requirement for success.***

This benchmark commercial coffee machine model has been designed to make the entire coffee making process SIMPLE.

One of the outstanding points of this machine which sets it aside from other coffee machines is the Automatic Turbo Steam Arm. It will heat and texture the milk without burning or splitting. The milk wand shuts down automatically at the correct temperature for perfectly textured milk.

Professional results are achieved every time using commercial quality 10g and 14g coffee pods. Now all staff can make great coffee regardless of their skill level.

The machines are manufactured by Expobar's skilled and experienced craftsmen which guarantees extreme reliability and user friendliness.

The Rosetta is ideally suited for Restaurants, Clubs, Pubs, Mobile Vans, Nursing Homes, Board Rooms, in fact wherever great coffee is to be offered!

- Automatic Turbo Steam Wand
- Tank Version Available
